Office Action Summary	Application No. 10/522,082	Applicant(s) DAHN ET AL.	
	Examiner Nathan M. Nutter	Art Unit 1796	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 21 May 2009 has been entered.

Response to Amendment

In response to the amendment filed 21 May 2009, the following is placed in effect.

The rejection of claims 1, 2, 4, 8, 10-12, 14 and 15 under 35 U.S.C. 102(b) as being anticipated by Ueda et al (EP 0 704 463) made in the Final rejection of 18 February 2009, is being held in abeyance until the offending language has been extricated from claims 1, 8, 10, 11, 12, 14 and 15. This rejection is not being withdrawn at this time.

The rejection of claims 1, 2 and 10-12 under 35 U.S.C. 102(b) as being anticipated by Matsunaga et al (EP 0 792 914) made in the Final rejection of 18 February 2009, is being held in abeyance until the offending language has been extricated from claims 1, 10, 11 and 12. This rejection is not being withdrawn at this time.

Art Unit: 1796

The rejection of claims 1, 2, 4, 5, 7, 8, 10-12, 14 and 15 under 35 U.S.C. 103(a) as being unpatentable over Ueda et al (EP 0 704 463) made in the Final rejection of 18 February 2009, is being held in abeyance until the offending language has been extricated from claims 1, 8, 10, 11, 12, 14 and 15. This rejection is not being withdrawn at this time.

The following new grounds of rejection are being presented.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1, 2, 4, 5, 8, 10-12, 14 and 15 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The recitation of "more than 97% (by weight)" in reference to the ethylene content of the copolymer produced in the second stage has not been shown as being supported by the Specification, as originally filed.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 16-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Ueda et al (EP 0 704 463).

Note paragraphs [0008], [0100]-[0112], [-126]-[0130], [0136]-[0145] and [0149]-[0150].

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 16-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ueda et al (EP 0 704 463).

The reference to Ueda et al teaches the production of a polyolefin composition that may comprise a propylene homopolymer with an ethylene copolymer having more an ethylene content that may be greater than 95% by weight paragraph [0145], as recited herein. The reference teaches addition of the third resin, recited in claims 7 and 14 at paragraphs [0126] et seq.. The reference teaches the polymerizations to occur in

Art Unit: 1796

the gas phase and under pressures and temperatures that embrace those taught herein. See paragraphs [0107] and [0143]. The order of the steps may be changeable as taught by the reference at paragraph [0008]. Further, the crystallinity of the third resin component, due to the relative % by weight amounts of comonomer would be expected to produce a polymer having a higher branching distribution, and thus, be less crystalline. Nothing unexpected has been shown on the record.

Response to Arguments

Applicant's arguments with respect to claims 1, 2, 4, 5, 8, 10-12 and 14-19 have been considered but are moot in view of the new grounds of rejection.

All arguments of record are maintained.
